

2015 Biomedical Research Awards

| Organization | Amount Awarded | Website |
|--|----------------|--|
| University of Texas at San Antonio <i>Effect of early (pre-) frailty on cardiovascular performance and CVD risk factors</i> | \$30,000.00 | www.utsa.edu |
| University of Texas at San Antonio <i>Cellular mechanisms underlying pain relief by dorsal root ganglion stimulation in an animal model of diabetic neuropathy</i> | \$27,290.00 | www.utsa.edu |
| University of Texas at San Antonio <i>Development of a Monoclonal Antibody Product to Diminish Apoptosis in Diabetic Renal, Ocular and Vascular Complications</i> | \$19,500.00 | www.utsa.edu |
| University of Texas at San Antonio <i>Enhanced Anti-Cancer Treatments Inspired by Bio-essential Elements: Selenium and Tellurium Nano-Alloys as Potential Therapeutic Agents</i> | \$22,000.00 | www.utsa.edu |
| University of Texas at San Antonio <i>Self-association of membrane receptors involved in insulin sensitivity</i> | \$21,000.00 | www.utsa.edu |
| University of Texas Health Science Center <i>WTAP: A novel contributing factor in leukemogenesis</i> | \$30,000.00 | www.uthscsa.edu |
| University of Texas Health Science Center <i>Positive Deviance in Childhood Obesity</i> | \$23,550.00 | www.uthscsa.edu |
| University of Texas Health Science Center <i>Inhibition of Nox4-mTOR Axis: A Novel Therapy for Diabetic Cardiomyopathy</i> | \$30,000.00 | www.uthscsa.edu |
